

Developer of IT Innovative Solutions

www.ngine-innovation.com

A high-tech basis rounded out with versatility !

The team is not only experienced on every step of the project process, it is also interested in a wider prospect.

It aims to support its clients well beyond the bounds of project management. Its proficiency starts prior to the expression of a need and branches out to the monitoring of implemented solutions.

N-Gine Innovation, engine of you evolution !

The company aims to conduct the development of its clients' IT policy. The overseas experience of its team enables N-Gine Innovation to provide services worldwide.

Strong values

- **Responsibility** : Commitment on deadlines, deliverables and costs
- **Open-mindedness** : A team attentive to your needs and respectful of your policy and state of mind
- **Quality** : Willingness to build sustainable solutions
- **Implication** : A team involved in your success

A comprehensive contribution that spreads out of the usual fields !

The editing activity brings about a true independence of thought. Indeed, the structure is not subject to the only trade-profitability of services.

N-Gine Innovation provides a comprehensive service : auditing, consulting, project management, analysis, planning, IT development, validation, release, maintenance and evolution.

Experience in innovative project management

A team is experienced in many fields such as financial auditing or healthcare. Dealing as a daily basis with innovative projects enables it to step in its clients' computer assignment whenever they need.
